Problems

According to a survey, one in four UK adults recorded that they had felt lonely within the last two weeks during the Coronavirus pandemic (Mental Health UK, 2020).

Lack of physical surroundings

The biggest source of worry is how hybrid learning is devoid of all things available in physical learning.

Loneliness and Procrastination

Being alone in room in front of laptop whole day can make one's mind wander everywhere along with no motivation to work.

Irregular Work Schedule

Online Temptations can distract one and being at home easily disrupts one's schedule

Solutions

Our goal is to make a web application to manage and focus on work, and not feel lonely in online/hybrid environment.

01 **Chatbot**

It interacts with you during your lectures or meetings, hence providing companionship.

02 **Pomodoro**

It improves planning. Helps you focus more. Helps fight procrastination. Breaks the habit of multitasking.

03 **To-Do List**

To Do list is integrated with checklists for urgent work to do and want to do.

Our Target Market

The main targets are young school or college students.

Students

Attending online lectures alone is boring and depressing.

Their major problems are lack of motivation, loneliness,
irregular study schedule and lack of focus

Approach

For making chatbot some python chatbot libraries. For backend and integration we used flask and javascript. Website designing is done using HTML/CSS

TECHNOLOGIES USED

01   HTML / CSS

02   JAVASCRIPT

03   PYTHON / FLASK

Future Roadmap

.

Mobile Connectivity

AUTOMATICALLY SET ALARMS/REMINDERS ACCORDING TO TO-DO LIST

Site-Blocker

TO PREVENT ONLINE TEMPTATIONS

Enhance Privacy

SHARING DATA, TALKING TO A CHATBOT LEAD TO INSECURITY/PRIVACY ISSUES

Working Hours

TOTAL WORKING HOURS WILL BE CALCULATED USING POMODORO AND PERFORMANCE WILL BE ANALYZED
